

ForgeOne™ CRM Launches EagleView® Integration to Bring Aerial Roof Measurements Into the Job

Contractors can order EagleView measurement reports from a ForgeOne CRM job and receive the results on that same job.

FORT WORTH, Texas — October 16, 2026 — ForgeOne™ CRM, the contractor management platform built by a contractor for contractors, today announced an integration with EagleView, a provider of aerial imagery and roof measurement reports. Contractors can now order reports without leaving ForgeOne CRM.

Measurements drive every estimate, material order and insurance supplement. By tying each report to its job, the integration eliminates downloading, re-uploading and retyping measurement data.

With the integration, contractors can:

- Order EagleView roof measurement reports directly from a job
- Use the property address already on the job
- Receive completed reports on the job file
- Use the same measurements for estimating, ordering and insurance

“Measurements are where every roofing job starts, and they shouldn’t live in a separate inbox,” said James McGaugh, Founder & Owner of ForgeOne CRM. “Now the EagleView report is ordered from the job and comes back to the job.”

The EagleView integration is available now. Contractors can connect their EagleView account from the Integrations tab in settings. Learn more at integrations.forgeonecrm.com.

ABOUT EAGLEVIEW

EagleView Technologies, Inc. provides high-resolution aerial imagery, data analytics and property measurement solutions used by contractors, insurance carriers and government agencies.

ABOUT FORGEONE™ CRM

ForgeOne CRM is a Fort Worth, Texas-based contractor management platform built from years of hands-on contractor and insurance workflow experience. It connects supplier ordering, measurements, estimating, financing, payments, file storage and accounting to a single job record, so teams stop rebuilding the same work in multiple systems. ForgeOne CRM is available on the web, the Apple App Store and Google Play. Learn more at forgeonecrm.com.
